SOCIETY OF HISPANIC PROFESSIONAL ENGINEERS' LA FAMILIA 2013

Every year SHPE holds their outreach event, La Familia. As an organization, SHPE/UA members and Southern Arizona SHPE Professional Chapter members teach attendees how to use various computer programs. The daylong event consists of three workshops, ranging from English beginner to Spanish advanced.

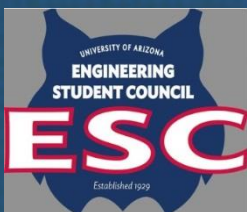

This year's event took place on Saturday, October 26, 2013 at the UofA with a little over 90 attendees. The day began with an opening ceremony led by Andrea Acuña, SHPE/UA's La Familia Vice President and guest speakers Wanda Ronquillo and Jesus Acevedo both from IBM. The day was ended with a closing ceremony and a raffle of three desktop computers donated by Rise Equipment Recycling.

The SHPE/UA executive board would like to thank everyone involved with the process of making this year's La Familia possible. SHPE/UA is always looking to improve itself and its members, which would not be possible without the interaction of the community.

Jessica Reynoso

SHPE/UA President
